DB RESOURCES Services

DB Resources focuses primarily on the following services:

- ERP Practice
- BI Practice
- EAI Practice
- Corporate Training
- Custom Development

ERP Practice:

We have deep expertise in implementing major ERP (Enterprise Resource Planning) packages - SAP, Oracle eBusiness Suite, J.D. Edwards, PeopleSoft. We have experience in managing and delivering multi-phased global implementations across many industries. Our consultants have expertise in implementation methodologies, project management skills, conducting work shops, defining scope, Business Requirement collection/Analysis, As-Is and To-be design processes, Gap Analysis, Application setup/Configuration, Solution design, Change management, Super-user and End-user Training, Production deployment, Cut-over and Post production Support. Our consultants can help you in new implementations, Process Improvement, Process redesign, Upgrades, Application Sun Setting, Contingent/Supplemental staffing and Testing. Our consultants have experience in managing off-shore and on-shore resources. We have in-house consultants available for functional, technical as well as project management related activities.

Our consultants have years of experience in implementing the following:

- Order Fulfillment / Sales and distribution
- Procurement
- Financials
- Manufacturing
- Warehouse Management
- Customer Relationship Management
- Advance Supply Chain Management/ Planning
- Human Resources Management

On the technical front, our consultants are equipped with designing, developing and implementing FRICE elements (Forms, Reports, Interfaces, Integrations, Conversions, and Enhancements) and QA for your ERP implementations. We also have qualified consultants for Database Administration, Basis Administration and CNC related engagements.

We focus on the following ERP packages :

- **SAP**
- **Oracle eBusiness Suite**
- **JD Edwards**
- **PeopleSoft**

BI Practice:

Our consultants can help you to build a comprehensive Data warehousing solution which will allow you to access, manage, share and analyze data in a holistic view and will help you to make informed decisions.

We specialize in SAP, Oracle and Business Objects Business Intelligence solutions. We have participated in some of the largest SAP and Oracle BI Implementations. We offer services around:

- New BI implementations
